

Testing Center Requirements

PC Specifications

Each workstation must meet the following requirements:

1. Windows 2000, XP (SP3) 32-bit, 2003, Vista 32-bit,64-bit, Windows 7 32-bit/64-bit
2. Firefox version 4.0 or later
3. Pentium 4 or better processor
4. 1 GB RAM
5. 8 GB free disk space
6. Antivirus Solution
7. 17" Monitor with a resolution of 1024x768
8. Network Connection 100Mbps

Please note that computers must have the latest OS and antivirus updates installed on a daily basis.

Internet connectivity Requirements

As a rule, internet connectivity must meet the following guidelines for each testing session.

1. For each workstation connected to TestDirect.net you will need to provide 50Kbps connection.
2. For a testing center with 20 workstations, you will need:

$$20 \times 50 \text{ Kbps} = 1000 \text{ Kbps}$$

In this case, a **dedicated** connection/bandwidth of 1Mbps will be sufficient. As with all internet connections, the more bandwidth available, the better.
